**Grant Information:** Please use complete phrases/sentences. Fields will expand as you type.

1. **Grant Agreement Number:** 06-138-559-0

2. **Project Title:** San Dieguito Lagoon Freshwater Runoff Treatment Ponds

3. **Project Purpose - Problem Being Addressed:** The project site is located adjacent to a large estuary that is about to undergo a major tidal wetland restoration. Adjacent to the project site on the other side is a shopping center. There is a culvert under the shopping center that funnels run-off from a 313-acre residential watershed directly onto the project site. The run-off introduces sedimentation, oils, nutrients and other pollutants, and has contributed to the buildup of mature invasive plant species. The volume of freshwater that flows into the area would degrade the salt marsh habitat of the newly restored tidal wetlands. The project will construct four connected water treatment ponds to clean the polluted runoff and remove invasive species and then replant with native vegetation.

4. **Project Goals**

a. **Short-term Goals:** Construct a natural swale system of interconnected ponds to treat urban runoff before the runoff reaches adjacent newly restored tidal wetlands.

b. **Long-term Goals:** Improve quality of water reaching the newly restored tidal wetlands; Educate the public about water quality and the importance of watershed protection; and Enhance native habitat biodiversity.

5. **Project Location:** (lat/longs, watershed, etc.) 32.978056; -117.249167 San Dieguito Watershed

a. **Physical Size of Project:** (miles, acres, sq. ft., etc.) 5 acres

b. **Counties Included in the Project:** San Diego

c. **Legislative Districts:** (Assembly and Senate) Assembly 74 and Senate 38
